

# REDFLIFE

VOLUME 2

REDFLIFE, ALBERTA, FRIDAY, SEPT. 6, 1912.

NUMBER 36

## NEW INDUSTRIES

The publisher of the Review was informed just before going to press by very reliable authority that we will undoubtedly be authorized by the Town Site Owners to announce in next week's issue three of the largest industries for

## REDFLIFE

that has ever been located in Western Canada, employing hundreds of men.

### SCHOOL IS NOW OPEN

The Redcliff public school opened last Tuesday morning with Mr. R. K. Colter and Miss Georgia Gordon as teachers. There is an increased attendance over last term of 30 pupils, which shows that Redcliff has increased in population considerably since last spring. Mr. Dudley, who the Review announced last week would take the place of Mr. Colter as principal and teacher, notified the school board that he had accepted a position with the Calgary high school and would therefore not come to Redcliff. Mr. Colter was communicated with and he agreed to fill the position for the first three weeks, the school board in the meantime are looking for someone to take his place.

### Population Still Decreasing

LONDON, Sept. 4.—A blue-book just published contains the report of the registrar-general for Ireland. During last year the births in Ireland numbered 101,750 and the deaths 72,475, giving a natural increase in population of 29,275, while the number of emigrants was 30,273, leaving a net reduction in population of 1,000. The decrease in the population of Ireland during the decade 1901-1911 was 17 per cent., or against a decrease of 4.32 per cent. for the preceding decade.

### Held to a Large Estate

[From the New-Telegram.] There is in the Chancery Court an estate which has now reached the figure of \$12,000,000. It lies there, unclaimed, in the name of Walters, an English family name, but has been daily advertised for without avail. It is now known, almost to a certainty, that this came from a man first died at Patal, Cleveland, Auckland, New Zealand, that he knew he was the heir, and that he refused to claim the money.

His death took place suddenly, and it was at the necessary inquest that the facts came to the knowledge of the public. Richard Walters was an old-age pensioner, and was employed by a Mr. Mayson as gardener. He had later on his employer's documents which the latter considered afforded quite conclusive proof that he was the heir to the family estate of Walters. The man gave for a reason why he took any steps to secure the millions was that it was too much trouble, as he was becoming an old man.

### START DRILLING NEW GAS WELL

The Lockwood Well Drilling Company moved their drilling machinery from the Hat to Redcliff this week and it is being set up near the Brick & Coal Company's plant where they will commence the drilling of a gas well just as soon as the machinery is in place, which will probably be about the middle of next week. This well is being drilled to furnish the Brick & Coal Company with gas, they being supplied at present from the well in the north end of town.

### Will Hold A Social

The Ladies Aid will hold a social and musical event Wednesday evening Sept. 11, commencing at 8 o'clock, at the residence of Dr. R. R. Stoner. A lunch will also be served. A small charge of 25 cents will be made and it is hoped that all who are interested in church work will be present.

### Won Second Prize in Running Race

William Watson, of Redcliff, won the second prize in the one mile running race at the Labor Day sporting event held in Medicine Hat last Monday. There were several entries in race, one representing the high school of Grand Forks, North Dakota.

### Let Contract for 1,500 Cars

The Canadian Pacific Railway Company has given an order for 1,500 box cars, representing an outlay of \$1,200,000 to the National Steel Car Company of Hamilton, Ont.

### Reception to Premier Borden

A large number of public men from all parts of Canada are expected in Quebec to greet Premier Borden on his return from Europe. According to present arrangements, the Premier will be transferred from the steamer Victoria to a government steamer, and will land at the King's wharf, where he will be escorted to the city hall where a civic address will be presented by Mayor Drouin.

## BREVITIES

Dr. Brown, J. R. C. P. London, Eng., eye specialist, will be at Dr. E. W. Brown's office, Redcliff, for consultation on eye, ear, nose and throat during the next ten days. Eyes tested and glasses supplied. Hours 9 a.m. to 6 p.m.

Donald McGuigan, who has been the bookkeeper for the Redcliff Realty Company for the past year, has severed his connection with that company. He left Wednesday morning for a short visit to his old home in Minneapolis, and will return in about two weeks and will be connected with a townsite company now being formed by Medicine Hat capitalist who propose to start a new town about five miles southeast of the Hat.

Miss Sadie Irvine has returned to Redcliff and has taken the position vacated by Donald McGuigan as bookkeeper and stenographer for the Redcliff Realty Company.

Arthur Peterson, W. A. Stewart and Robert Bowman, who have been employed by the Ornamental Iron Company for some time past, severed their connection with company Thursday and left for their old home in Minneapolis early this morning.

Four men arrived here last Monday morning from Toronto and went to work in the fitting department of the Ornamental Iron Company.

Mr. J. Dingwall returned to Redcliff last Saturday after spending a two weeks' vacation in Winnipeg, Man., and Duluth, Minn.

Mr. and Mrs. Rutherford spent the week in Calgary to witness the Stampede. Jack came to this part of the country when they need to have rural stampedes.

Mr. R. E. Nicholson, of Calgary, spent Sunday and Monday in Redcliff visiting with his brother, Mr. A. J. Nicholson.

Mr. and Mrs. W. H. Sherwin and their daughter, Miss Marion went to Calgary last Sunday. Mr. Sherwin returned Wednesday but the ladies did not return until last night.

Dr. W. M. Brown, father of Dr. E. W. Brown, of this city, who stopped here on his way to Edmonton to attend the medical convention and who afterwards journeyed to the coast, returned to Redcliff last Tuesday and will spend several days with his wife before returning to his home in Ontario.

Among the Redcliff people who journeyed to Calgary this week to witness the Stampede were the following: Messrs. Wm. McLean, Donald McLaughlin, Arthur Peterson, Wm. Fehrmann, Roy Chapman, S. Miller, James Lavelle, E. Hube, D. McKellar, McKellar, Robert Clark, Ralph White, J. Harwood, H. A. Ireland, H. R. Slingland, Miss McKellar and Miss McKay.

Mr. and Mrs. H. Sampson, of Brandon, Man., arrived in Redcliff Wednesday of this week for a short visit with their son, Mr. H. M. Sampson, of the Imperial bank.

## ANOTHER RECORD RUN

Brick & Coal Company Turn Out Large Amount of Brick in August.

The Redcliff Brick & Coal Company again broke their record in the month of August in brick making, turning out 2,265,000, of which 800,000 were pressed and 1,465,000 were wire cut. This record has never been equaled by any other plant in Western Canada and will probably stand as the record for some time to come. The company expect to turn out a large amount in September but do not expect to equal the output of last month. These bricks are being shipped out just as fast as they can be loaded to towns as far east as Regina, and as far west as Vancouver and north to Saskatoon and Edmonton.

## MEETING OF RATE-PAYERS

Mr. Donald McLaughlin, returning officer for the first town election, has decided to call a meeting of the ratepayers for Saturday, September 21st, from 11 a.m. to 12 noon for the purpose of nominating candidates for mayor and six councillors. If there are more candidates nominated than there are positions to fill the election will be held the following Saturday, Sept. 28, but should there be one candidate for mayor and six for councillors the returning officer declares them elected at the time of their nomination.

Already a good deal of interest is being taken in the choice of town officials and several have been mentioned for mayor and councillors, among whom are D. Broadfoot, E. C. Danetz, Patrick Lavelle, C. T. Hall, C. E. Oakland, Wm. Riddell, Robert Hamilton, Wm. McLean and Wm. Keels.

## Great Secrecy Maintained.

In connection with the new home rule bill, it is interesting to recall the measures taken for the printing of the rough draft of the bill of 1889, and the care taken to ensure secrecy. The draft copy was put up so securely that each compositor at the office got only three lines to "set," so that he could not form even the least notion as to what the bill proposed to establish in Ireland. The duty of arranging the numerous lines of type in their consecutive order was committed to one only of the most trustworthy men in the office, and when a dozen copies had been printed for the use of the Cabinet the printer had the type immediately broken up and distributed before the Cabinet, however, had finished their deliberations on the bill a copy was found on a writing table in the library of the Reform Club, but the printer returned it to the absent-minded minister who, it was said, had left it there after writing a letter.

## Honest Reporter Returns \$10,000.

ADDRESS, last, Sept. 4.—When an express wagon came out of an office after making a delivery to a store this evening William H. Doolan, a local newspaper reporter, noticed a package fall from the wagon. The driver went on, not knowing of the loss of the package. Doolan took the package into police headquarters. Soon afterward the wagon driver and an agent reached into police headquarters of the package. It contained a \$10,000 remittance to a Chicago bank.

Dr. R. E. Stoner left for anti-cancer points last Saturday morning. He is expected back the last of this week or the first of next.

## "NOT EVEN THINKING OF WAR."

Newspaper Man Out With a Remarkable Editorial on Canal Question.

"Norman Angell" (Ralph Norman Angell Lane), the author and newspaper correspondent, who has been general manager of the London Daily Mail in Paris since 1905, contributes to that paper a striking article on the Panama canal law, entitled "Why not fight?"

He starts out by suggesting hypothetically a series of offenses committed by Germany against England, which he says would give an Anglo-German war infinitely greater justification than most wars of history and would indeed make war inevitable.

Those offenses are intended as exact parallels or what the English regard as American offenses against England in the last ten years and whose logical method of settlement would be by war.

"Let us," says Mr. Lane, "have not gone to war. We shall not go to war. We are not even thinking of war." This, he argues, is not because blood is thicker than water, for when the Americans were really of English blood, when they are not now, we were to war with them twice, so it is not for that reason that we submit to the affairs of the Americans. The reason is because we would be ineffective.

"We could not impose our will by war," America is not only impregnable but is quite obviously so. We could, if we tried, destroy her navy, bombard her cities, block her commerce, but we should thereby create more enemies for ourselves than for her. She won't, outlast us, we would starve.

## Church Notes.

On last Sabbath morning the people met for the first time for public worship in the new school house, which is west of Redcliff. Notwithstanding the unfavorable weather, 21 persons were present.

Last Sabbath evening at divine worship Mr. A. Lowrie Robson sang "The Holy City," which was truly enjoyed by a large audience. The solo next Sunday evening will be rendered by Mr. D. C. Smith. Rev. Mr. Gordon's subject of discourse will be "The Authority of Jesus."

The people of Redcliff are giving a farewell to their missionary student, Mr. R. B. Johnson, tonight, as he will soon be leaving for college. A number of Redcliff people are going out to attend the affair. Mr. Johnson has made himself and his services popular with young and old alike.

## Laurier to Speak in Quebec.

Much political significance is attached at Ottawa to the opening speech to be delivered by Sir Wilfrid Laurier at Montreuil, Que., on Saturday, Sept. 7. The ex-premier will go to Rouville, the county represented in the federal house by Hon. Rudolph Lemieux, as a compliment to the ex-actor of that county and the neighboring county of St. Jean du Berthier for the fidelity to the principles of the Liberal party. He was not able to speak there during his tour during his campaign last fall.

The Liberal leaders state a united Quebec in the days of yore is their aim and Laurier will be used as a magnet to attract backsliders. The Liberal leader will not propound any policy and will simply content himself with advising the electors to wait as far as the naval policy is concerned.

Mr. H. O. Wheeler is expected to return home from a visit to the States, where he has been for the past month, the first of next week.

## WHAT TO SAY ABOUT REDCLIFF

Redcliff is situated on the main line of the C. P. R. 173 miles east of Calgary, on the banks of the Saskatchewan river.

Natural gas is probably Redcliff's first and greatest asset—meeting the requirements of a great demand as may be made for manufacturing purposes.

Working coal mines on both sides of the river, and immense deposits cropping out yet unexplored.

Brick and other clay products are manufactured extensively and additional enterprises for this line of industry are in contemplation.

The business houses and residences are practically all of brick—home product.

Silica sands abound, tests of which have proven an excellent quality for glass making.

Industrial sites are donated to new enterprises.

Surrounding territory is in the heart of Alberta's wheat belt, and there are no more prosperous farmers in the world than here.

REDFLIFE ALREADY HAS A flour mill that will grind 78,000 bushels of wheat per month or 930,000 bushels per year.

A large ornamental iron works that expects to employ 150 men before the last of September.

Two plants for making brick and clay products, the demand for which is increasing constantly.

One protestant church.

A fine, new, thoroughly modern brick school house.

An excellent gas lighting system, and mains laid throughout the city.

An assessed valuation of \$600,000 and a municipal tax levy of six mills.

As fine a three-story modern brick hotel as there is in the west.

A perfect system of water works—water pure as the mountain springs.

The first building erected in Redcliff was April 21, 1910, just two years ago.

## DR. CHASE'S NERVE FOOD

Nearly every woman will read with interest the letter of Mrs. George Bradshaw, quoted below. It tells of years of great suffering from Nervous Headache and other symptoms arising from weak, watery blood and a starved and exhausted condition of the nervous system.

Mrs. George Bradshaw, Cook Nook, Harlow, Ont., writes:—"I am glad to state that I received benefits from Dr. Chase's Nerve Food which I failed to get any place else."

After many years, in fact from my early womanhood, with weak, watery blood, and given to dropsy, I suffered untold agonies from nervous sick headaches, dizziness, and sinking spells, in fact was a semi-invalid for many years. I tried many kinds of patent medicines, and got no help, and tried every new doctor that came along, but all failed to help me. Doctors told me I had no blood, etc., that my heart and kidneys were diseased, and that I had no many complaints. I was so much as in doctoring up one or two. Four years ago, I was told to try Dr. Chase's Nerve Food, and was glad to see it felt better, and then got six more, and they have cured me of many of my complaints. When I began taking Nerve Food I weighed 110 pounds, and today I weigh 139, and am 65 years of age. I am now Dr. Chase's Nerve Food, etc., a box, for \$1.50 at all dealers or direct from, H. J. & Co., Limited, Toronto.

Explained  
I hear Miss Strongmild has checked poor Thompson, said Dabney. Did, but true, said Wilkins.

Why, I always thought Thompson was a brick at Dabney. He is, said Wilkins. That's why she threw him. I guess Judge.

Very Likely  
His Honor (gazing at intoxicated prisoner) "What is he charged with, officer?"

Officer (newly appointed) "Oh, don't know, yer honor, but I think it's straight whisky—Judge."

Very few helpme are made in France, most of the supply coming from England and Germany.

Guarding a Royal Train  
Few people know that the passage of a royal train is more of an every day of the way, by the journey of the Sovereign short or long.

Many people laugh when they read of times upon the lines of soldiers drawn up along the railway route to the place where the train travels, but the same thing practically happens in Russia, and only without the ostentatious display of uniforms.

Which the Royal train is to pass, is quite as effectively guarded, though to all appearance there is nobody there.

A German merchant, resident in Moscow, has left all his fortune, as he is said to have, to all those of his employees who have served under him for five years. The merchant's part is to be reckoned on the basis of the first annual wage multiplied by the number of years they have been in his service. The men who have worked for the firm less than five years receive a joint sum of \$20,000, which is to be divided according to wages and length of service. "The firm" has been a success since the business inherited by them into a joint firm, company.

Mr. Kadon—Isn't that a delightful sketchbook, Henry?  
Henry—"I consider it innocent as it has been proven guilty."

Schoolgirl An Athlete  
For the fifth year in succession a Rutherford girl has won the sports championship of the Canadian Community Schools in South London.

Nellie Stewart is 15 and the daughter of the keeper of the Rutherford mortuary. Her latest trophy was the championship of the girls' school athletic meeting, where she was tied in six events and won in four others.

She won the championship first when she was nine, and has secured it every year since, although the girl competitors have numbered more than 1,700 each time.

I don't train in any special way, says Nellie. My father gives me plenty of eggs, and I have running exercises.

Besides her sports trophies, Nellie has a first-class swimming certificate, and until recently she was captain of the net ball team of her school. Also she can show five medals for good conduct and attendance.

Up to now she has secured thirty-one prizes of different kinds.

Formula  
Stella—How did he propose?  
Lella—He asked if he could be my vice-prince—New York city.

### A Grim Previa

A curious conception has sprung up in Paris. Several doctors have received a circular from a new-formulated agency, which offers to find patients who are suffering from the disease. The fees are rather high. They vary from \$20 to \$100. On receipt of the fee the doctor is supposed to send a list of 20 names, 10 of which are to be of the patients who are suffering from the disease and 10 of which are to be of the patients who are not suffering from the disease. The agency's circular declares that the list of patients are compiled from absolutely certain sources and that the money will be returned if there are more than three mistakes in each list. This is rather a grim proviso.

### A Remarkable Dog

A dog which had, during nine years of its life, collected upwards of 10,000 cents under remarkable conditions, died on Saturday at Reading. The money had been devoted to local charities. The dog never carried a box, but begged for a coin. For a half-penny the dog demanded a biscuit as a condition of releasing the coin, and two biscuits were required in exchange for a penny or two coins. In all the dog had earned 15,000 biscuits in its philanthropic collecting.

### Collier's Nimble Wit

While the king was looking at a pet pony which had been brought up for his inspection the pony proved somewhat restless. I expect the daylight worried him, said the king. No, sir, replied the minister, it is the horse that is restless. He can't see your majesty plain enough—London Spectator.

### Anxious to Know

Officer, she said, hastening to the policeman, that person has been following me for some time. Do you want me to arrest him? No, but I wish you would find out whether he thinks I'm beautiful or not. I was your age once, said the policeman, and I never saw a prettier girl than you. —The Birmingham Age-Herald.

### Continues Langley

I believe honesty pays in the long run. So do I, but I often wish it were not such a mighty long run—Chicago Record-Herald.

### In Chocchit, Okla.

In Chocchit, Okla., at the state orphans home there was a little chap whose wit was ahead of his memory. His teacher was having a time teaching him the President's relation. "Cheney, Johnny, she admonished, why are you your age? I could say the president's names forward and backward, but I can't begin in the middle and go either way. She was much taken back by the reply. Yes, but when you were my age there wasn't any more presidents.

### Calling Pa

Ma put over a good one on pa, all right, all right.

What was it? I was talking up a shelf in the kitchen and accidentally hit my thumb with the hammer. While he was dancing around, saying a lot of awfully long railway words, he said, "John, stop that language right away, but remember you're not out of a baseball park now—The Trust Free Press.

Women are inconsistent, always. What is the matter now? That girl I was engaged to be married to is giving me a lot of her property now she has attached it in a breach of promise action.

One Charitable Act  
Hubby—Well, I did one charitable act today.

Wife—I'm so glad, dear. Tell me all about it.

Hubby—Oh, there isn't much to tell. One of my clerks asked for an allowance to go to a baseball game, and I refused to give it to him.

Evidence of Experience  
What has come to think that man has had experience with railroad cars?

He doesn't show any inclination to get into any of them—Washington Star.

### As to a Mirror

"Stranger at the door," I am trying to find a lady whose name I have forgotten, but I know she lives in this neighborhood. She is a singularly beautiful creature, with pink and white complexion, dark eyes, long hair, and hair such as a goddess would have. —Veil—Really, sir, I don't know.

Voice (from head of stairs)—Jane tell the gentleman I'll be down in a minute.

He—If I should kiss you, what would happen?

He—Then I won't do it.

He—Then I won't do it.

He—Then I won't do it.

He—Then I won't do it.

He—Then I won't do it.

He—Then I won't do it.

He—Then I won't do it.

He—Then I won't do it.

MOONEY'S BISCUITS  
WINNIPEG  
DOOYES  
PERFECTION  
CREAM SOUS

TOO MUCH BAKING HAS KILLED MANY A WOMAN

Too many hours over a hot stove—too few for rest and recreation, MOONEY has changed all this.

MOONEY'S BISCUITS are made especially to replace home baking—to give the tired woman's chance.

MOONEY takes biscuits for their time and place, from the elaborate function to the daily meal.

## MOONEY'S PERFECTION SODA BISCUITS

are the freshest, crispest, creamiest, biscuits ever made. If you have never used them you have a delightful treat in store.

They sell in dainty packages or in tins boxes—in either case free from every adulteration

"LET MOONEY DO IT"

Synopsis of Canadian Northwest Land Regulations.

Any person who is the sole head of a family or any male over 18 years old, may homestead a quarter section of available Dominion land in Manitoba, Saskatchewan or Alberta. The applicant must appear in person at the Dominion Lands Agency on Sub-

Agency for the district. Entry by proxy may be made at any agency on certain conditions, by father, mother, son, daughter, brother or sister of intending homesteader.

Duties—Six months' residence upon and cultivation of the land in each of three years. A homesteader may file within nine miles of his homestead on a farm of at least 30 acres solely owned and occupied by him or by his father, mother, son, daughter, brother or sister.

In certain districts a homesteader in good standing may pre-empt a quarter section alongside his homestead. Price \$3.00 per acre. Duties—Must reside six months in each of six years from date of homestead entry (including the time required to earn homestead patent) and cultivate fifty acres.

A homesteader who has exhausted his homestead right and cannot obtain a pre-emption may enter for a purchased homestead in certain districts. Price \$2.00 per acre. Duties—Must reside six months in each of three years, cultivate fifty acres and erect a house worth \$500.00.

Coal—Coal mining rights may be leased for a period of twenty-one years renewable at an annual rental of \$1 per acre; not more than 2,500 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

## Canadian Woman Snowbound.

GENEVA, Sept. 4.—Miss Sommerville, a Canadian Alpinist, has joined her parents in Geneva, after being over 30 hours, 10 of which she spent in a hut in the Mont Blanc range during a snowstorm and with a sprained ankle.

The young Canadian lady, who is a good climber, started from Courmayeur, Italy, with a guide to cross the Col de Grevin, 11,681 feet high, to Chamonix, and was overtaken by a violent snow storm. During the hurried descent to gain the shelter of the hut, she slipped and twisted her ankle.

Miss Sommerville says an Alpine storm surprised her forcibly a Canadian blizzard, but happily it does not last so long.

About the same time Miss Oshliff, of London, who is staying at Aoste, was caught in the same storm while climbing Mont Corv'et, 8,125 feet high and was forced to spend many hours in an Alpine hut.

A party of Italian guides set out in search of the "lost" Englishwomen, and after a useless quest returned to Aoste to find that she had arrived safely several hours before.

## Governor of New Zealand.

The Earl of Liverpool has just been appointed governor of the Dominion of New Zealand in succession to Lord Islington. The earl's father, who died in 1867, served in the naval brigade in the New Zealand war in 1865 and was present at the storming of Rangiiri.

The earl is the husband of the only daughter of the Viscount Monck, of County Wicklow, Ireland. The couple are childless and the title probably will descend to the present holder.

## For Sale

Lots 17 and 18, block 77 These lots are on the corner of Broadway and Sixth street. The price is \$1,000 for the two. Two of the finest business lots in Redcliff. Terms one-third cash, balance six and twelve months. For further information see W. H. Hatcher, Review office.

### TO THE POINT.

[From the Chicago News.]

Only the office without a salary has to seek the man.

About the only thing father gets on his birthday is in lemon.

Modern young men court in haste and repeat at leisure.

Some girls are given away in marriage and some throw themselves away.

If a man's backbone is weak he will never occupy a front seat in the hall of fame.

A man has no use for a woman who attempts to convince him he is wrong and succeeds in doing it.

When a bachelor gets the idea under his hat he understands a young widow all she has to do is to lead him to the parson.

The smaller the man the bigger the boast.

In the language of lovers, kisses speak louder than words.

There is a thing that cannot be had.

There are more brands of cussedness than there are brands of religion.

Anyway, a married man never has to wait any time in making up his mind.

Some women are so changeable that they never wear the same complexion twice.

Most people are anxious to get away from the house when a man begins to blow his own horn.

Sometimes a man who eliminates for people to put on his home industry marries a girl from another town.

Next to running the government as it ought to be run, a man is seldom quite sure what he could do best.

It takes a brave man to face a little woman at the head of stairs at 2 p. m.

Flattery wins the world.

A man thinks he has a natural gift for farming if he knows a load of hay from a ton of coal.

### AT THE GATE.

[From Our Dumb Animals.]  
Well, Roger, my dear old doggie, they say that your race is run; And out of this world you're going down the world are dear; You're only a dog, old fellow—a dog, and you've had your day.

But never a friend of all my friends has been braver than you always.

We've had glorious times together in the fields and pastures far; In storms and sunny weather we've romped without a care.

And however many have treated me, though foul or fair their deal, I never may forget the great I failed, I've found you true as steel.

That's right my dear old fellow, look up with your knowing eye; And lick my hand with your loving tongue that never fails to die; And don't be afraid, old doggie, if your time has come to go.

For someone here on the great I know there's a place for you I know.

Then don't you worry, old comrade, and don't you fear to die; For out in that fairer country I'll find you by and by.

And I'll stand by you old fellow, and our love will surely win; For never a heart will harbor me where they won't let Roger in.

When I reach that glorious here, behind the waiting gates; Just come and stand outside the gate and wag your tail and say—

And I'll hear your voice and know it, and I'll come to the gate and say, "St. Peter, that's my dog out there; you must let him come this way."

Then I know the gate will open and you will come frisking in; And we'll roam fair fields together in that country free from sin.

So never you mind, old Roger, if your time has come to go; You've been true to me; I'll be true to you, and the Lord is good, we know.

You're only a dog, old fellow—a dog, Well, I'm getting there myself, old boy, and haven't long to stay; But you've stood by me, old comrade, and I'm bound to stand by you; So don't you worry, old Roger, for our love will pull us through.

Or's half brother.

The new governor of New Zealand has estates in Lincolnshire and Nottinghamshire and is a keen sportsman.

Hunting, shooting and cricket are his favorite recreations. He is a descendant of the half-brother of the second earl of Liverpool who was British prime minister from 1812 to 1827.
